PROFILE SUMMARY

Dedicated and results-driven Full Stack Developer with over 2+ years of experience in managing software development projects, I am eager to enhance my expertise by contributing my skills to an IT company specializing in software development. With a passion for software technologies.

TECHNICAL SKILLS

- Angular, ReactJs, Vuejs, Nestjs, JavaScript
- Html, Css3, Bootstrap4
- PostgreSQL

EDUCATION

- Bachelor of Engineering (B.E) in Computer Science and Engineering from Alpha College of Engineering, Thirumazhisai, Tamil Nadu, (2015 - 2019)

WORK EXPERIENCE

Associate Software Engineer | Cloud Ripples Private Limited

Project: Theatrical Release Management Application

A web tool to generate a new asset prototype for a movie or TV show, where a client agent will submit content for revision using a workflow such as watermarked and production. A client can upload a new asset, admins can review and give some feedback by approving or rejecting.

Responsibility and Contribution:

- Understanding the business requirement & design
- Developed responsive UI designs
- Coding and implementing the modules in NestJS to store the data from the web
- Ensured developed components are tested end to end.

Environment: Angular, NestJS, Typescript

Project : Movie Digital Marketing

This project aimed to modernize a media company's repository, featuring OKTA authentication with distinct permission groups. Registered users could curate movie and TV series lists, categorized by production, and easily share favorites via email. The application, accessible on web and mobile platforms, streamlined media asset search for the content development team.

Responsibilities and Contribution:

- Understanding the business requirement & design
- Involved In developing the search APIs with a set of different filters.
- Developed responsive UI designs
- Assisting with browser compatibility issues as they arise.

Environment: Angular, NestJS, Typescript

Project : Task Management Application

This project is for a user-friendly system that allows users to create Main tasks and associate Sub tasks, a more organized view of project tasks. By providing detailed task information and progress indicators, users gained a clearer understanding of their tasks, fostering better project comprehension.

Responsibility and Contribution:

- Understanding the business requirement & design
- Developed responsive UI designs
- Ensured developed components are tested end to end.
- Coding and implementing the modules in React Typescript and NestJS.

Environment: React , NestJs , Typescript

Project : Doctor Clinic Consultation Application

This project for online medical treatment and consultation. Public - Request home consultation, Enquire about doctor, Refer library resources, Search clinics, Join doctor online community. Doctor - Patient groups, Clinic & home consultation request, clinical resources, Patient query handling support.

Responsibility and Contribution:

- Understanding the business requirement & design
- Developed responsive UI designs
- Ensured developed components are tested end to end.

Environment: Vue Js, NodeJS

Software Engineering Trainee | Anabhayan Technology Pvt Ltd

- Software Design and Development: Design, develop, and maintain web based applications, components, and systems.
- Problem-Solving: Apply critical thinking and problem-solving skills to complex software problems and recommend solutions.
- Testing and Debugging: Test software to ensure that it meets requirements, fix any bugs or issues, and maintain high-quality software.

PERSONAL SKILLS

- Innovative with willingness to learn.
- Ability to learn quickly and adopted any environment
- Ability to handle pressure situations.

INTERESTS

- Playing Cricket , Volleyball
- Passionate about technology and learn new things
